<https://github.com/GoodnessFx>

Full-stack developer skilled in building scalable web/mobile apps , designing and deploying Solidity smart contracts on EVM, with experience across dApps, APIs, and blockchain integrations. Focused on performance, security, and scalable architecture.

PROJECTS

LockIn

Builtand designed a mobile “97Day gamified growth” app that helps users stay locked in to their goals until achieved, storing proof of growth.and ensuring growth

UpNext

Designed a prediction market where users invest in upcoming talents, turning discovery into tradeablevalue.“STOCKMARKETFORPEOPLE”.

GatePass

Developed a decentralized event ticketing app that eliminates fraud and enables verifiable access.

AnyPay

Built a universal value router that lets anyone pay with anything and settle in anything else.

ChopLife

Designed a mobile app that auto-deducts small amounts from transactions, allowsusers to save money helping users hit rent targets without stress so they can “Chop Life”

OffSend

Developed an offline-first payment protocol that guarantees transactions even in poor or no network coverage.

Ruguard

Built a security layer for DeFi that prevents rug pulls and delivers actionable signals to investors.

SKILLS

- Ethers.js
- Hardhat
- JavaScript
- Node.js
- React.js
- React Native
- Solidity
- TypeScript
- wagmi + RainbowKit

SOFT SKILLS

- Collaboration
- Critical Thinking
- Learning Mindset
- Ownership
- Research
- Teamwork

EDUCATION

Electronic & Computer Engineering

Lagos State University

Lagos

02/2022 - 12/2024
