Lagos, Nigeria • linkedin.com/in/goodnessiyamah • https://github.com/GoodnessFx

Software Engineer

Software engineer with 3+ years of experience owning the entire build, from database schema to production deployment, across React/Next.js, Node.js/Express/Hono, and PostgreSQL/Supabase, with Solidity and smart contract development. Currently running Growth Network, shipping production software and growth systems for Nigerian SME clients.

WORK EXPERIENCE

Growth Network • Lagos, Nigeria 2026
Founder & Lead Engineer • Full-time
Live: https://growth-network.pxxlspace.cv/

- Own technical delivery for a live SME client portfolio, from architecture and database design through deployment, plus the growth systems (web, social, ads, SEO) that keep those businesses winning leads.
- Designed and built an operator-first platform that lets founders run multiple client businesses from one command center.
- Lead a 7-person developer squad; ran a 31-day build sprint focused on shipping production tools end to end.
- Shipped production websites and growth systems for 5+ Nigerian SME clients, each delivered end to end from database schema to deployed frontend.

Goodman & Goldsmith • Nigeria 2025
Software Engineer • Contract
Live: https://www.goodmanandgoldsmith.com/

- Built and deployed the company website end to end, from React frontend through hosting and deployment, as their engaged software engineer.

PROJECTS

ChainCodeCamp *(Next.js, Supabase, MDX)*
Live: https://chain-code-camp.vercel.app/
Smart contract security education platform built around a 10-section audit training curriculum, structured after Cyfrin-style, hands-on EVM security teaching.

Professor R.I.S. Agbede Foundation *(React)*
Live: https://prisafoundation.org/
Non-profit website with integrated donation flows across Paystack, Flutterwave, and crypto rails, giving the foundation a single trusted place to receive support.

BuySmart Procurement *(React, Vite)*
Live: https://buysmartprocurement.com/
Website and digital growth system for a Lagos procurement and logistics company, built around a certification and proof-of-work angle that shortened the buyer decision cycle.

Hamdan Integrated Services (Export Trade) *(React)*
Live: http://www.hamdanexport.com/
Production website for an import/export trading company, built to convert organic search traffic into direct buyer inquiries.

Grind *(Solidity, Base L2, React, TypeScript)*
Live: https://grind-server.vercel.app/
On-chain escrow campus gig marketplace on Base L2, with cNGN payments and on-chain reputation via GrindScore and GrindDID smart contracts.

TOBI *(React, Vite, Hono, Supabase, Claude API)*
Repo: https://github.com/GoodnessFx/Tobi
Personal AI assistant that connects to a user's work and personal life to remember context and actively assist day to day, with a developer mode that turns it into an in-context coding companion.

SKILLS

React, Next.js, TypeScript, React Native, Node.js, Express, Hono, Vite, Tailwind, Supabase, PostgreSQL, Drizzle ORM, REST APIs, WebSockets, Git, Solidity, Foundry, Client Delivery, Team Leadership

Cyfrin Updraft *(Smart Contract Security Certification)*

EDUCATION

Oduduwa University • Ipetumodu, Ife 2024 to Present
B.Eng, Computer Engineering

Lagos State University • Lagos, Nigeria 2022 to 2024
National Diploma, Electronic & Computer Engineering
